Business Objectives

Our aim

To understand the sales performance, customer trends, and product popularity across regions in the US from 2021 to 2024.

Key Questions

- Which products and regions drive the most sales?
- How stable are our product sales over time?
- How do customer trends and monthly performance look?
- Where are opportunities for growth or improvement?

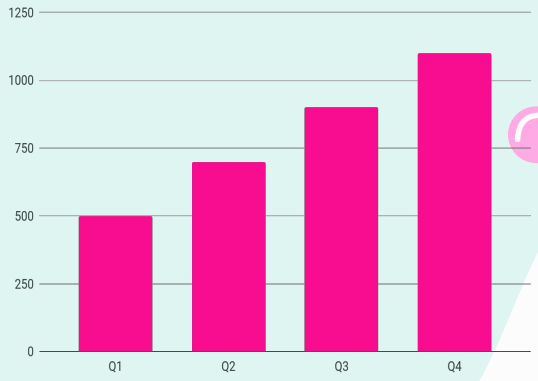
Data Exploration and Cleaning

Initial Steps:

- Loaded the dataset and Data Interpreter in Tableau was used for initial data profiling.
- Implemented the relevant join operations.

Data Cleaning:

- Removed null values while working with the sheets.
- Standardized product and region names.
- Created calculated fields for Avg. Order Value, Stability Metrics.
- Created parameter for selected candies.



- ➢ Checked distributions of sales and customers.
- ➢ Segmented data by product type and region for deeper insights.

Sweets Sales Distribution: 2021-2024

Total Production	Total Number of Customers	Total Sales	Avg order value
38,654	5,044	$142K	$13.91

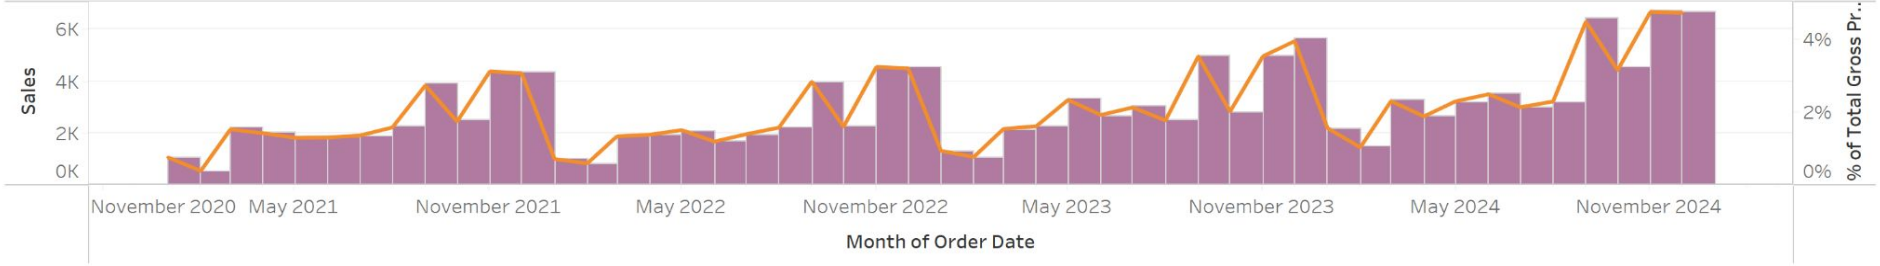
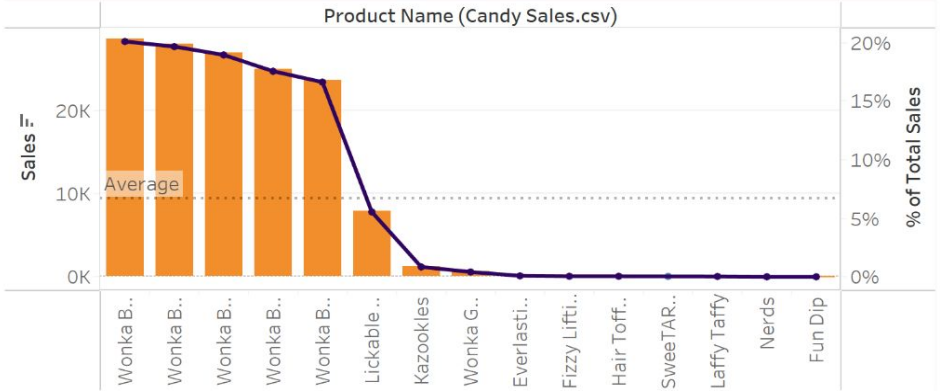
Sales and Profit by months

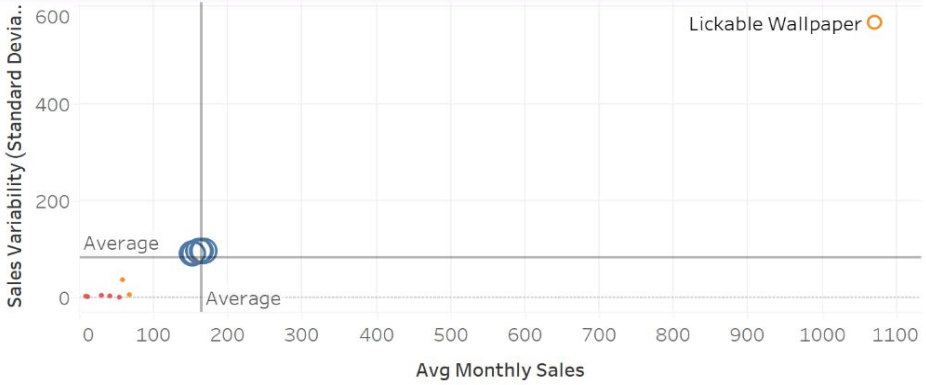
Measure Names: % of Total Gross Prof.., Sales
Is Selected Candy?: False, True
Sales: 12, 10,000, 20,000, 28,485
Division: Chocolate, Other, Sugar



Top-Selling Products by Sales Contribution



Candy Type Stability Analysis: Avg Sales vs Variability



Key Findings

- California and New York lead in total revenue making them high-value markets for the business.
- Chocolate products dominate sales indicating a strong customer preference across regions.
- Sales peak during Q4 suggesting seasonal buying behavior and opportunities for holiday-based promotions.
- High unit sales in some regions don’t always translate to high profits pointing toward pricing or cost inefficiencies.
- Product performance varies significantly by region showing the need for localized product and marketing strategies.

Recommendation

- Revise pricing strategies in low-profit regions to increase margin without hurting volume.
- Launch targeted Q4 promotional campaigns to capitalize on predictable seasonal spikes.
- Expand distribution of high-performing products (especially chocolates) in underpenetrated regions.
- Optimize logistics and shipping methods in regions showing delays or cost inefficiencies.
- Use customer segmentation and regional filters to tailor offerings and loyalty programs for different market segments.
