EDUCATION

- Santa Clara University** Santa Clara, California
Master of Science in Information Systems
Sept 2023 - Jun 2025
Relevant coursework: Data Analytics-Python, DBMS(Design/Development), Tableau, NLP, Big Data, Data Structures, Machine Learning.
- Gayatri Vidya Parishad College Of Engineering** Visakhapatnam, India
Bachelor of Technology in Computer Science And Engineering
Jul 2015 - May 2019

SKILLS SUMMARY

- Languages:** SQL, Python (NumPy, Pandas, OOP), Java (OOP), Gremlin (Graph Traversal), PySpark, Hadoop, MySQL, HiveQL, HTML, CSS, HTL (Sightly)
- Tools And Libraries:** Tableau, Looker, Advanced Excel, Power BI, BigQuery, Snowflake, Git, JIRA, Google Analytics, HubSpot, Adobe AEM, SQLAlchemy, Matplotlib, Seaborn, NLTK, Scikit-learn, Graph Databases (Neo4j, TinkerPop)
- ML Models:** XGBoost, Random Forest, Logistic Regression, Linear Regression, Decision Trees, CNN, RNN, LSTM, Clustering, SVM, PCA, LDA, KNN, Ridge/Lasso, Recommendation Models

EXPERIENCE

- Santa Clara University** Santa Clara, California
Teaching Assistant – Business Intelligence and Data Warehousing
Jan 2025 - Jun 2025
 - Taught Tableau for data visualization through lectures, demos, and hands on projects, guiding students to build dashboards that highlight anomalies, patterns, and KPIs for informed business decision making.
- Cisco** Santa Clara, California
Product Data Scientist — Practicum Intern
Jan 2024 - Jun 2024
 - Analyzed large-scale RMA datasets using SQL and Python (Pandas, NumPy) to identify recurring issues, trends, and patterns, providing insights that improved product reliability and reduced resolution times.
 - Built analytical models to map customer reported issues to engineering solutions, enabling faster problem resolution and more efficient support workflows.
- Accenture** Hyderabad, India
Application Development Analyst
Dec 2021 - Apr 2023
 - Collaborated with CTC and AT&T clients to analyze user behavior and web performance using Google Analytics, SQL, and Excel, achieving a 10% reduction in page load times and a 5% increase in user engagement.
 - Designed and interpreted A/B tests to evaluate web content performance, leveraging analytics and user feedback to optimize AEM modules, resulting in a 22% improvement in page efficiency.
 - Conducted in depth web analytics to identify user behavior issues and navigation friction points, providing insights that enhanced user experience and improved overall site performance.
- Infosys Limited** Hyderabad, India
System Engineer
Sept 2019 - Dec 2021
 - Partnered with Apple on the Beats by Dre e commerce platform, using Tableau and Excel to analyze site performance and user interactions, leading to design improvements and a 15% boost in operational efficiency.
 - Conducted advanced product analytics with SQL and Python to uncover usage patterns, enabling feature optimization, UX design enhancements, and improved customer journey insights.
 - Built performance dashboards and KPI reports for marketing and brand teams, providing real time visibility into adoption trends, product performance, and campaign outcomes.

PROJECTS

- Candy Sales Dashboard (Tableau)** - Built interactive Tableau dashboard with KPIs and drill downs to track sales and shipping performance, supporting data driven business recommendations.
- Job Market Insights (Segmentation)** - Applied clustering and regression in Python to segment job postings, uncover skill trends, and forecast salaries, showcasing techniques transferable to customer segmentation and advertiser analytics.
- Email Priority & Spam Classification (NLP)** - Built Gmail API pipeline with NLP and ML models to detect spam and classify priority, demonstrating ability to analyze communication data for targeted insights.
- Weather Forecasting (ML)** - Developed ensemble models (XGBoost, Random Forest, LightGBM) to classify weather conditions and simulate real time alerts, highlighting regression and time series modeling.
- Graph Database Analytics (Neo4j)** - Designed Gremlin queries in Neo4j to visualize hierarchies and detect anomalies across large relational datasets.
